

# ***We Need Your Experience, Strength and Hope!***

The area 8A Public Relations Committee has been contacting treatment centers in our area and supplying them with information about GA.

So far they have been very receptive and several of them have requested that we have members come in and share their stories.

We have commitments with two treatment centers and several others pending.

As of now we are compiling a list of people who would be interested in sharing. There will be a clean time requirement of 6 months but a person with less time can volunteer if their sponsor is present.

We will be holding several workshops in the near future and you would be required to attend at least one before speaking. The reason for this is each treatment center has their own guidelines on:

- 1) How long a speaker should talk.
- 2) Interacting with clients before and after speaking.
- 3) General do's and don'ts when speaking.

If you are interested in attending a workshop and being added to a potential speaker list, please contact us at:
